Career training that's plumb & true

Inside: Students, staff undaunted by COVID, challenges

Getting it done!

Through a pandemic, through distance, through difficult times, our students persevered and rose to the challenges, achieving goals and marching along pathways toward their dreams.

There are certain high-demand skills that simply cannot be “off-shored” or obtained online, making a BOCES career education program a good start to a rewarding future.

Lessons in giving, caring...

Students in our New Visions program participated in the local “Day of Caring” on October 19, with as many as 80 BOCES students from schools throughout our region doing their part as volunteers at several non-profit groups and agencies.

CELEBRATE

Our Exploring Art & Design students, teacher Christine Crossgrove and visiting mosaic artist Lui Gobbo created a 6-foot tall mosaic called “Our Collaboration Tree.” The project began in the maker space at BOCES’ main campus and culminated with a showcase event called “Culture, Community & The Classroom” at Roberson Museum & Science Center in Binghamton.

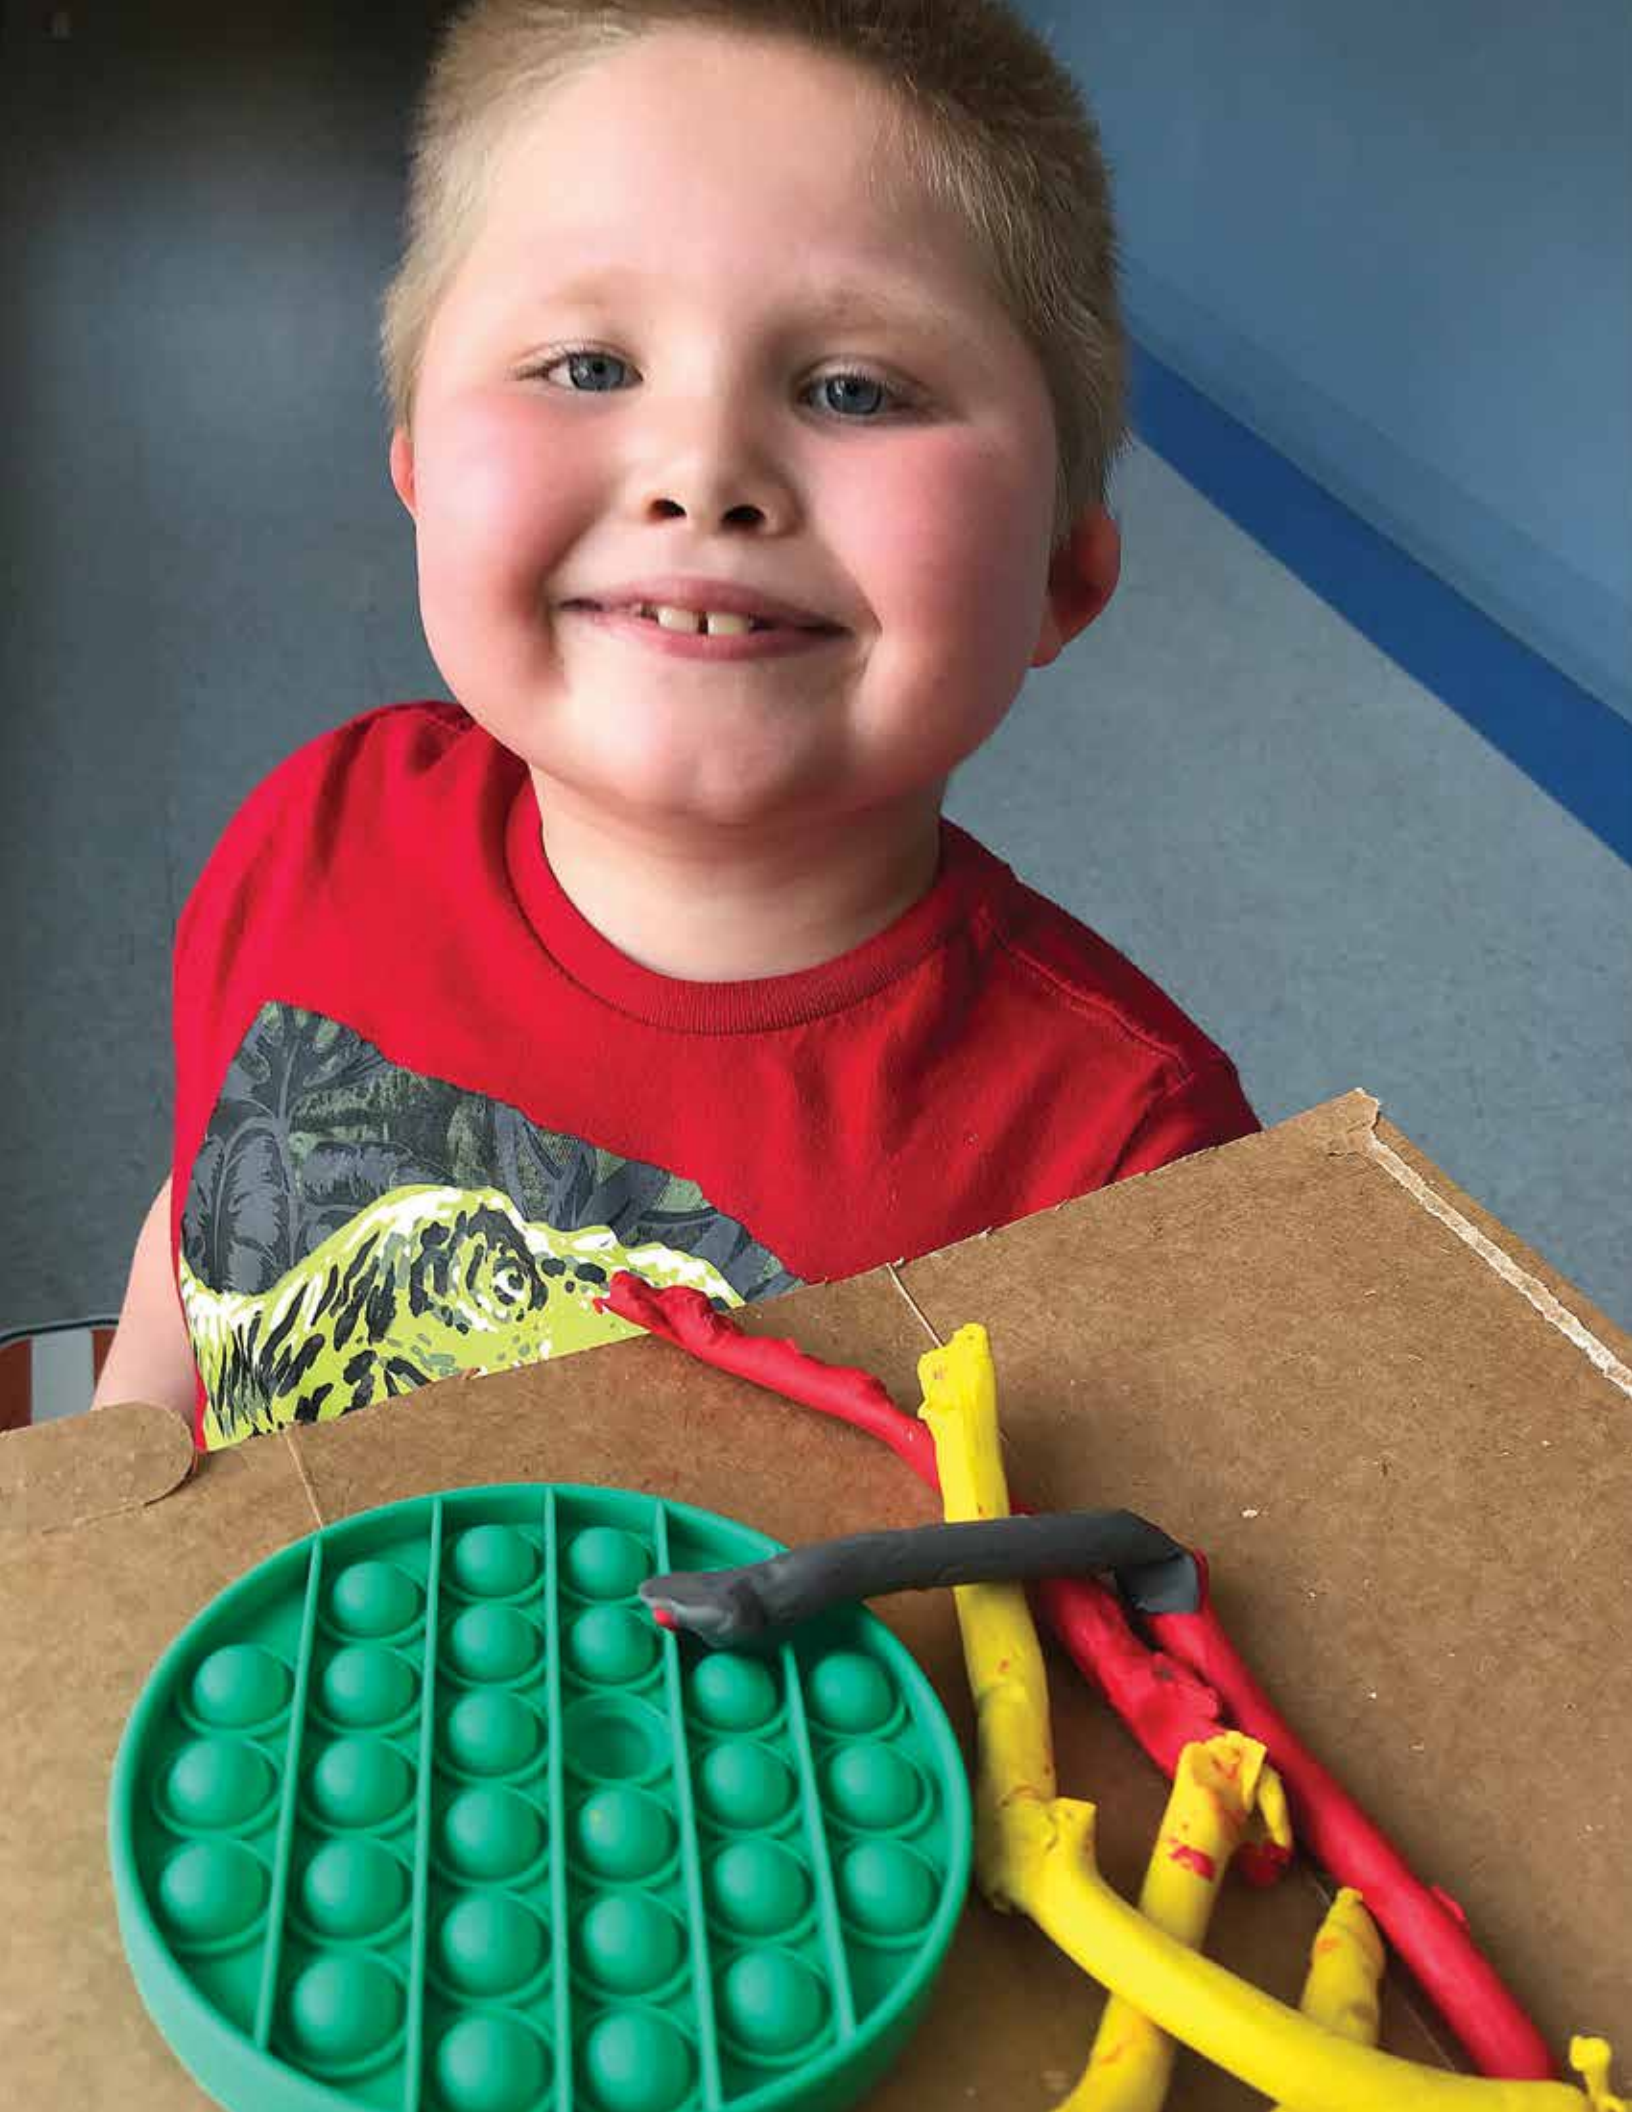

From novice to expert, BOCES' culinary and hospitality programs teach real-world skills that lead to careers.

Learning made fun

Sure, it's tough to see past the masks, but we've gotten use to it, to a degree ...

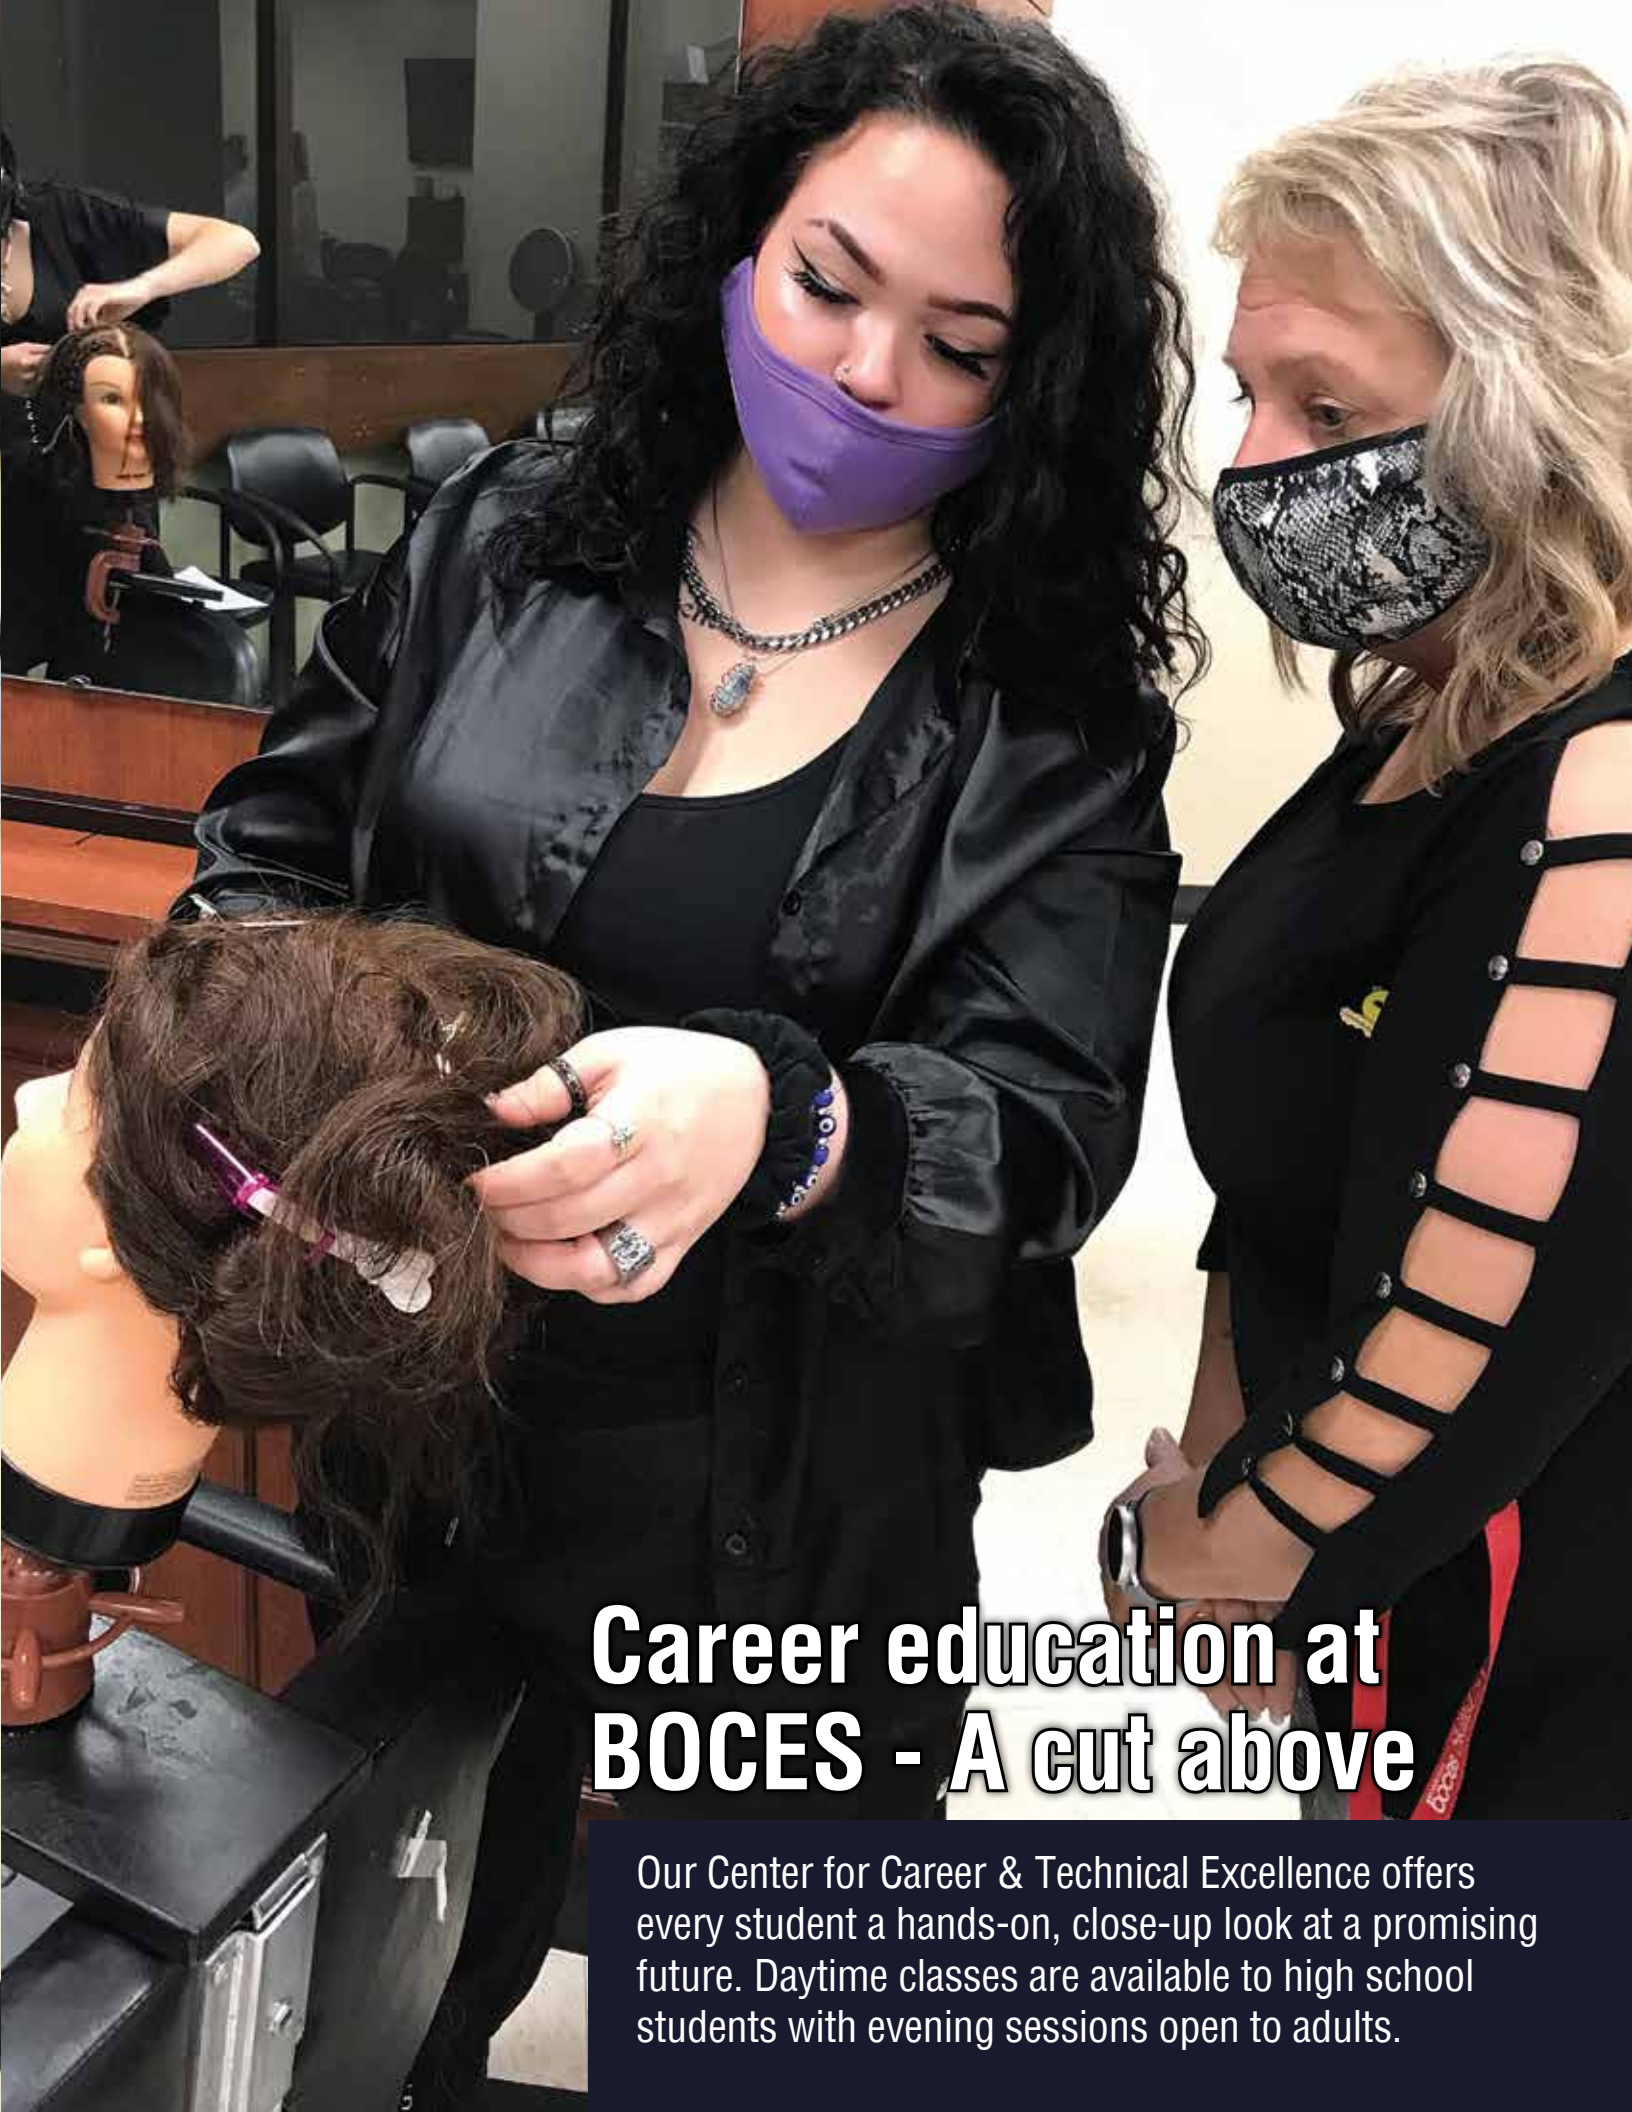

... at least enough so that we can see the smiles in one another's eyes.

Career education at BOCES - A cut above

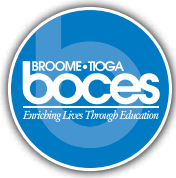

Our Center for Career & Technical Excellence offers every student a hands-on, close-up look at a promising future. Daytime classes are available to high school students with evening sessions open to adults.

The engineering challenge: making the simple complex

Rube Goldberg would be proud of these youngsters. Over three days, students ranging from grade three through 12 compete at Broome-Tioga BOCES' annual Engineering Day. Each day, approximately 200 students strive to create the best functional Rube Goldberg-like machine using only a box of everyday materials. Teams are given two hours to complete their machines before presenting to judges.

Thank You

Jean Graham (pictured far left), a US Air Force veteran and BOCES speech pathologist, served as veteran counselor with the “Twin Tiers Honor Flight” to Washington D.C. this fall. The veterans toured several sites, including the Vietnam Wall, the Lincoln Memorial, the World War II Museum and Arlington National Cemetery. Congratulations, Jean! And thank you for your service.
